

FleetInsight – Driving Business Efficiency

FleetInsight is a fast, reliable and feature rich vehicle tracking solution which offers fleet operators the control and visibility they need to reduce costs and increase productivity.

- Live view of fleet position and status
- Significant reductions in fuel spend
- Increased business capacity
- Improved productivity and service
- Control out of hours vehicle usage
- Tax and safety legislation compliance
- Increased security and driver safety

Live Tracking

FleetInsight provides live information on the location and status of every vehicle in a fleet. Vehicles are displayed on the latest interactive satellite mapping and all information is stored securely for 2 years and is available securely 24/7 on any internet enabled computer.

FleetInsight is fast and reliable and advanced features make operating a fleet a simple task with operators being able to sort and search vehicles by name, status or category and quickly search by proximity to an address or customer.

Driver Performance Monitoring

The most important aspect of reducing fuel costs and accidents in any fleet is the driver. FleetInsight monitors key driving style factors such as hard acceleration and braking, speeding, excessive engine idling and long journeys. By alerting on exceptional events and reporting graded driver performance, FleetInsight can help reduce accidents and vehicle servicing and improve fuel efficiency by up to 15%.

Comprehensive Reporting

FleetInsight includes a suite of tabular and graphical reports designed to help cut costs and manage vehicle and drivers more effectively. All reports are available on-screen and in PDF or Excel formats and can be run over any date range. Reports can be run at any time or scheduled for automatic delivery by email at any interval.

Report Categories:

- Activity & Management Reports
- Health & Safety Monitoring
- Driver Performance & Timesheets
- Fuel Efficiency KPI Reports
- Automatic Report Scheduling

Driver Identification

FleetInsight uses electronic Dallas keys to automatically record which driver is using the vehicle, this information is then stored with every journey.

All information is stored for two years providing an essential audit trail to resolve disputes and to monitor performance.

Service Management

Included with FleetInsight is a powerful service management tool capable of scheduling all vehicle service and administration milestones.

FleetInsight uses tracking data to accurately predict mileage based service events and sends automatic alerts by email.

Route Efficiency

By comparing the time and distance of each journey against intelligent route planning systems FleetInsight monitors how well drivers perform on every journey.

This information is then available in ranked reports and through the alerting system.

Eco-Impact Carbon Reduction

In today's world it is essential to be proactive in reducing carbon emissions in all aspects of running a fleet. FleetInsight includes Eco-Impact an exclusive module designed to show carbon output and the fleet's carbon trend over any period of time. FleetInsight helps a company to assess its own performance and to demonstrate to customers their carbon commitment.

Standard Specification

	Included		Included
Software Application		Reports Included	
Live Vehicle Tracking	✓	Vehicle & Driver Activity Reports	✓
Historic Reporting (up to 2 years)	✓	Fleet Utilisation Reports	✓
Street Level, Satellite & Birdseye Mapping	✓	Idling Summary & Alert Reports	✓
Fully Web Based Application	✓	Fleet Service & Driver Admin Report	✓
Advanced Features		Driver Health & Safety Report	✓
Location Tagging And Geofencing	✓	Driver Timesheet	✓
Snail Trail & Route Replay	✓	Driver Performance Grading Report	✓
Vehicle / Driver Categorisation	✓	Route Efficiency Grading Report	✓
Nearest Vehicle Search	✓	Geofence Activity Report	✓
DFT Live Traffic Information	✓	Optional Modules	
Intelligent Alerting Engine	✓	DriverTrak - Electronic Driver Identification	
SMS Driver Communications & Alerts	✓	ServiceTrak - Fleet Service Management	✓
Optional Back Office Integration		ScheduleTrak - Proactive Schedule Monitoring	
Driver Performance & Safety		FleetSecure - Remote Immobilisation	
Harsh Braking & Acceleration Monitoring	✓	EcoImpact - Carbon Emission Reporting	✓
Speeding	✓	Optional CAN-bus Integration	
Excessive Journey Times	✓	Contactless CAN-bus Integration	
Excessive Engine Idling Monitoring	✓	Real time MPG	
Journey & Time Efficiency Scoring	✓	Digital Tacho integration	
KPI Targeting	✓		

Optional Upgrades

	Price		Price
Installation Options		Hardware Options	
Vehicle PTO Monitoring		Contactless CAN-bus Integration	
Vehicle Door / Tail Lift Monitoring		Digital Tacho integration *	
'True Idling' Intelligent Engine Monitoring		Electronic Driver Identification	
Safety Options		Electronic Remote Immobiliser **	
Driver Panic Button		Rugged, Waterproof, Battery Powered Tracker	

* Requires CAN-bus Integration | ** Requires Electronic Driver ID
